

21st International Conference on Falls and Postural Stability

25th September 2020
Virtual Meeting

This annual event is widely recognised as the leading meeting in the UK for clinicians working in the field of falls and mobility medicine. The day provides a forum for scientific discussion and clinical updates and enables a multidisciplinary audience of over 200 professionals to share their experiences of best clinical practice.

Joining a virtual meeting

Participants can expect the same high-quality educational content as in a face-to-face meeting, and there will be opportunities for virtual delegates to network before, during and after each meeting. Participants joining live will be able to engage with presenters and sponsors through interactive activities during the session, as well as through 1 to 1 and group calls and chats. Recordings of the presentations will be accessible post-event.

Participants will attend via Swapcard who provides simple access via web browser, tablet or phone. A browser other than Internet Explorer (IE) needs to be used.

CPD accreditation

BGS has applied for **5 CPD accreditation with the RCP**. Participants watching a live event must sign in with their full name when joining. If participants join viewing as a group they must contact us by email with their full name, email address and place of work to registrations@bgs.org.uk. Participant must register before the live event start to claim CPD credits. **We cannot send CPD certificate to participants who haven't registered in advance.**

Participants accessing the archived version of the virtual event may record this in their CPD diary using the approval code provided for the live event for up to 12 months after the event date.

Who should register

The meeting will be of benefit to all healthcare professionals involved in falls and mobility medicine, geriatric medicine and healthcare of older people:

- Consultants and professors in geriatric medicine
- Specialty Doctors
- Specialist Registrars (StRs) in geriatric medicine and related specialties
- Nurse consultants, nurse specialists and advanced nurse practitioners
- GPs with an interest in the care of Older People and GP trainees
- Physiotherapists, occupational therapists and allied health professionals
- Researchers into ageing and age-related conditions
- Core medical trainees and foundation year doctors
- Medical students

Meeting aims

- Further attendee's overall knowledge and understanding of current research and practice in healthcare of older people in core and difficult areas
- Improve attendee's skills in the treatment and care of older people
- Inspire attendees to achieve personnel excellence in healthcare of older people
- Take away new activities and ideas to progress their workplace's services

PROGRAMME

Touchless fall detection and monitored well-being solution

Vayyar Home delivers monitored living to protect and enhance resident wellbeing

-  No cameras
-  No buttons
-  No wearables

Simply place Vayyar Home on a wall and it will not only automatically detect falls and summon help, but also prevent falls through advanced health analytics:

Call **+972-52-204-2464**
Or email **rotem.geslevich@vayyar.com**

TRANSFORMING HEALTHCARE TAKES MORE THAN TALK. IT TAKES ACTION.

Achieving better patient outcomes while reducing costs is the goal. Let's reach for it together.

We're going beyond medical devices to help you deliver better care to more patients more efficiently. Here's how:

APPLYING OUR CAPABILITIES IN NEW WAYS

Our technical know-how, data analytics, and process expertise is helping providers improve operational efficiency, optimize care, and manage chronic disease in a coordinated, consistent way.

CREATING TRULY MEANINGFUL INNOVATIONS

Our technologies must work not only clinically, but also economically, by improving outcomes, reducing complications, lowering the overall cost of care, and enhancing patients' quality of life.

INCREASING ACCESS TO CARE

In emerging markets, we're assisting with infrastructure development, raising awareness of therapies and devices, and training physicians to use them.

SHARING RISK, EXPANDING IMPACT

We deeply believe our technologies, expertise, and services will lead to better patient results, so we're embarking on outcomes-based reimbursement agreements with insurers and hospital groups.

GOING FURTHER, TOGETHER

We're working in partnership with those who believe as we do that providing better, more efficient patient care is not only a worthy goal, but an imperative.

LET'S CREATE MORE VALUE IN HEALTHCARE — TOGETHER.
